

# FOLLY FIELD BEACH ENTRANCE

First, *welcome* to the email blast format of Regime communications. These will be shorter, more focused than the newsletter format, and more frequent. These will not be mailed, but will be available on the website for review.

**The Folly Field Owner's Association** has put up additional signs and gates at the beach entrances. This was in response to increase traffic, parking issues and problems after Hurricane Matthew, as beachgoers across the island began using the Folly Field beaches, and found parking to be a problem.

This is *not* a change in our access rights, and outside of a few questions, there have been no issues. The Board and IMC Resort Services, Inc. are now actively in contact with their Association, and it is a cordial relationship.

Please bear in mind that this neighborhood is a private community – those are NOT public streets. It is considered more of an “ungated community.” Fiddler's Cove owners, renters, tenants and their guests have Rite of Passage, *but that does not include parking*. **Please continue to be good neighbors!**

*Should there be any further questions,*  
Feel free to contact your Association Manager,

**AL PAUL**
