Rear Door Levers/ Knobs / Deadbolt Selections

Standard Deadbolt - *Available For Use On Rear Door Only*

Rear Door Lever Selections

Passage Lever

“OR”

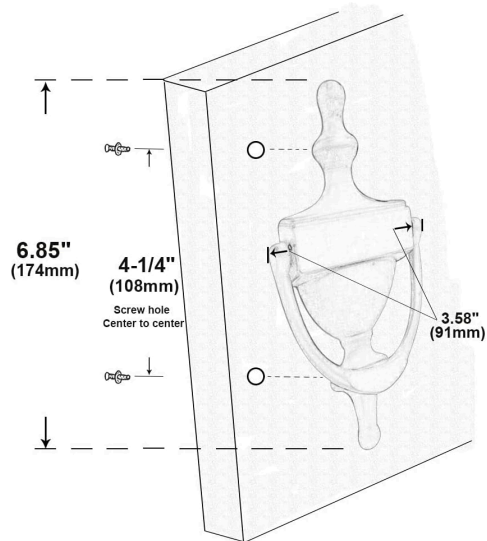

Entry Lever

Standard Door Viewer With Privacy Flap

Door Knockers

THIS IS THE ONLY OPTION AVAILABLE ON THE 4.25" SCREW CENTERS

All Lock hardware is by Schlage. The door viewer is by Emtek, The door knocker is a Taiwan import. All hardware is to be in a Satin Nickel finish.

The front doors are to have the “Century” design handleset and deadbolt on the exterior, giving a modern look to the building and having round *rosettes on the inside.

**The rosette is the portion of the lock that is tightened to the door.*

The reasoning for the round rosette is so that over time with normal usage the rosette does not appear to be out of square on the door as would happen and show with a century style rosette, resulting in an undesirable look.

Optionally, there is a WiFi enabled lock available for use on the front and or rear doors. It will be of a Century design and is also available with Apple Device capabilities as well for an additional charge.

The door viewer with flap is for those that currently have a door viewer and for those that would like to have one installed.

The door knocker is an urn style and is the only knocker that I have been able to locate that is compatible with the existing knockers installed on most units.

The rear doors would have a basic entrance (locking) or passage (non-locking) lever with the round rosette inside and outside along with either a mechanical or electronic deadbolt.

It would be the responsibility of each homeowner to pay Areawide Decorative hardware & Locksmith Inc. directly for the work performed on an individual unit.

We will be able to provide a quote to you prior to performing any work on your villa. Please fill out the questionnaire below.
