The Preserve at Indigo Run Pest Control Service Schedule – 2026

Beginning in January we will begin comprehensive pest control services for the community. These will consist of the following:

1. General Pest Control. This service will include application of repellent and insecticide to the exterior perimeter of all structures within the community. Specifically, building foundations, door and window frames, utility openings and all cracks and crevices. Additionally, interior garage service to baseboards and entry to the home interior will be performed for all homes choosing to add this service. Garages must be opened and remain open on the dates of service.
2. Rodent Control. Bait stations will be installed around the community waste disposal dumpster and maintained and re-baited monthly.
3. Mosquito Control. All foliage surrounding community structures, wooded perimeters and all community areas will be serviced for mosquito control. This service will be performed throughout the day. Residents who are outdoors will be advised to avoid areas under service or remain indoors until service is completed. Bushes and wooded areas should be avoided until 30 minutes after completion of servicing. Notices will be placed in prominent areas to alert residents of areas under service or just recently serviced.
