

INDIAN SPRINGS HOA, Inc.

Wireless Smoke Detector

*** CAUTION ***

Each condominium unit has one wireless smoke detector/sensor.

The one wireless smoke detector/sensor is extremely sensitive to air borne particulate matter (smoke, paint fumes, dust from sanding, etc.) and to motion.

Once the wireless unit detects abnormal levels of air borne particulate matter and/or is jarred or moved, ***an automatic signal is sent to the fire department*** requesting an emergency response to the condominium unit.

Owners, owners' guests and owners' contractors should not tamper with the wireless unit. (Do not knock it or attempt to move it or expose it to high concentrations of paint fumes or dust, which can occur during remodeling, or attempt to replace its batteries, etc.)

FOR SERVICE OR ASSISTANCE IN DEALING WITH THE WIRELESS SMOKE DETECTOR/SENSOR, PLEASE CONTACT YOUR ASSOCIATION MANAGER,

A.J. BUCKO
