

COTTON HOPE I & II
Board of Directors
2009

Interior Construction Guidelines

The following are guidelines to apply when renovating the interior of a Cotton Hope unit.

1. In a noise deterrent effort, owners are required to restrict the installation of tile flooring in a townhouse unit to only the foyer, kitchen and bath room on the first floor only.
2. In the event tile has been installed in the living room area of the first floor you are required to place throw rugs in the living room to dampen the hard sound that's transferred to the unit below.

Please be considerate of your neighbors and follow the guidelines listed above.
